# Aerodrome Flight Information Service (AFIS)

**Certified AFIS for your safe air traffic**

## Overview

Aerodrome Flight Information Service (AFIS) provides pilots with important information and instructions that are essential for the safe operation of flights. The operation of the aerodrome flight information service may only be carried out with a certification for AFIS services.

Due to the increase in air traffic and in order to enhance safety, including at aerodromes without air traffic controllers, **smaller aerodromes are now also required to provide certified AFIS.** The aerodromes required to provide AFIS are determined by law in accordance with specific criteria.

The **provision of AFIS in Germany is subject to certification by the Federal Supervisory Authority for Air Navigation Services (BAF).** DFS Aviation Services has obtained this certificate and offers you a range of AFIS options

*“In DFS Aviation Services, we are happy to have found a certified air navigation service provider as a professional partner. This puts us in the position to meet the rising requirements being placed on the airport.”*

Olaf Schmidt, Managing Director of Flugplatz Emden GmbH

## Our services for you

### 1. Outsourcing

- Acquisition / Hiring of AFIS personnel and related administration
- Provision of AFIS services according to the business hours at your aerodrome
- Refresher courses and training for AFIS specialists

### 2. Operation of AFIS

- Provision of AFIS services by personnel provided by the aerodrome according to the business hours there
- Support in the provision of refresher courses and training for AFIS specialists

### 3. Individual services and consultation

- Assistance in compliance with current regulations, e.g. conduct of audits by the relevant NSA
- Support in the creation of operationally required documents and records
- Additional support on projects for the expansion of your aerodrome

**DFS** Aviation Services

A brand of experience

## Your benefits

- ▶ Professionalised implementation of AFIS service provision by a certified ANSP
- ▶ Your aerodrome can concentrate on its core business
- ▶ DAS handles all certification tasks for the provision of AFIS services:
  - Creation and maintenance of supporting documents
  - Direct point of contact for supervisory authorities
  - Preparation, implementation and follow-up of NSA and EASA audits
  - Taking charge of licensing tasks for AFIS specialists
- ▶ In the case of outsourcing, we offer the following benefits:
  - No more HR management - removes the burden from your own organization
  - No more expensive training of personnel by the aerodrome operator
  - Flexible adjustment of staffing requirements
  - No more preparation / follow-up and collective bargaining
  - Pass on the risks of staff shortages
