Conversion Training

Remain competent in a fast changing ATM environment

Overview

Changes to the operational environment, system upgrades or changes to regulations and procedures. All of these bring with them the need for training in order for air traffic service personnel to **remain efficient and safe**. The need for conversion training is typically determined by **measuring the impact of the change on the ability of staff** to continue to perform their tasks competently.

Training specifications and objectives are designed based on either the client's request, or DFS Aviation Services can conduct an analysis to provide you with the **most efficient and comprehensive solution**.

Our conversion training is aimed at **maintaining current competences while using new systems or procedures implemented by the service provider**. The range of services offered in our training programme spans from classroom-based briefings to true-to-life advanced simulations with the option of custom scenarios and traffic patterns.

Course

Objectives

- Maintain ATCO competencies when changes in the operational environment make it necessary

Content

- Individually determined by the type and scope of the change in operations
- For example upgrade or change in ATM surveillance system or redesign of airspace

Target Group

- Service providers that are implementing a change in operational procedures or updating or replacing an ATM system

Length & Scope

- Determined by the scope of training required
- A training plan is created in consultation with you

Medium

- Classroom as well as practical exercises as needed
- Also available via virtual classroom and remote simulation

Assessments/Certification

- Certifications and/or assessments may be conducted based on your needs

Additional remarks

- DFS Aviation Services also provides an additional train-the-trainer programme to qualify your own instructors for further in-house conversion courses

DFS Aviation Services

A brand of experience

Benefits

- ▶ **Designed specifically to address training needs** stemming from an operational change, syllabi are based on pre-identified key areas and focused on a set of objectives
- ▶ **Training plans are created in cooperation with operational requirements**, thus allowing for training to take place with minimal impact on day to day operations
- ▶ **Distance learning solutions available** by means of virtual classroom and remote simulation
- ▶ Access to our **international pool of experienced in-house instructors** (civilian and military)
- ▶ Available **train-the-trainer programme** to empower your own instructors
- ▶ **Possible use of state-of-the-art simulators at our training academy**, providing students with a true-to-life training environment

“Conversion training must be able to respond to change! As a certified ANSP, we know that, for example, when implementing new systems, subsequent changes can often occur at various milestones (e.g. SAT). Training is updated and monitored and the syllabus amended to grow with your project.”
