CIV/MIL COOPERATION

DFS Aviation Services

50 years
of experience in the
development of an
integrated model of civ-mil
ATM in Germany.

DFS Aviation Services 

FLEXIBLE USE OF AIRSPACE (FUA).

Airspace management concept, according to which airspace should not be designated as either civil or military airspace. Airspace is considered as **one continuum** in which all user requirements must be **accommodated** to the maximum extent possible.

KNOWING
PARTNER-
SHIPS

At **DAS**, we offer more than “just” consulting services! We guide you through the whole project implementation process starting from **strategy development** to the later **post implementation support**. Through close collaboration, we can take on challenges based on your desired level of involvement – whether this is a **turnkey solution** or **advisory services**.

“We support the customer **from early strategy inception until implementation** and later operations. As **certified ANSP** with experience in **Civ/Mil Cooperation** we can assist in projects as an advisor for experienced guidance or take over the role as **full-service provider** including the technical infrastructure realisation. “
