

DFS Aviation Services

OPS CONSULTING

DFS Aviation Services

OVERVIEW.

As broad as the name of this topic suggests, we offer **consulting services** on **all operational matters** that relate to **Air Traffic Services**. These range from **organisational topics** (e.g. corporate development for ANSPs), **operational topics** (e.g. operational processes and/or operational documents), to **service-transition** (e.g. support in the transition of a service).

DFS Aviation Services, as part of **DFS Group**, is an **ANSP in itself** for which we deal with such operational matters as part of our **daily business**. We offer this **expertise** of “been-there-done-that” to our customers, so that they can **expedite their results**.

KNOWING
PARTERSHIPS

At **DAS**, we offer more than “just” consulting services! We guide you through the whole project implementation process starting from **strategy development** to the later **post implementation support**. Through close collaboration, we can take on challenges based on your desired level of involvement – whether this is a **turnkey solution** or **advisory services**.

“We support the customer **from early strategy inception until implementation** and later operations. As **certified ANSP** with experience in **OPS Consulting** we can assist in projects as an advisor for experienced guidance or take over the role as **full-service provider** including the technical infrastructure realisation. “
