

DFS Aviation Services

SYSTEM TRANSITION

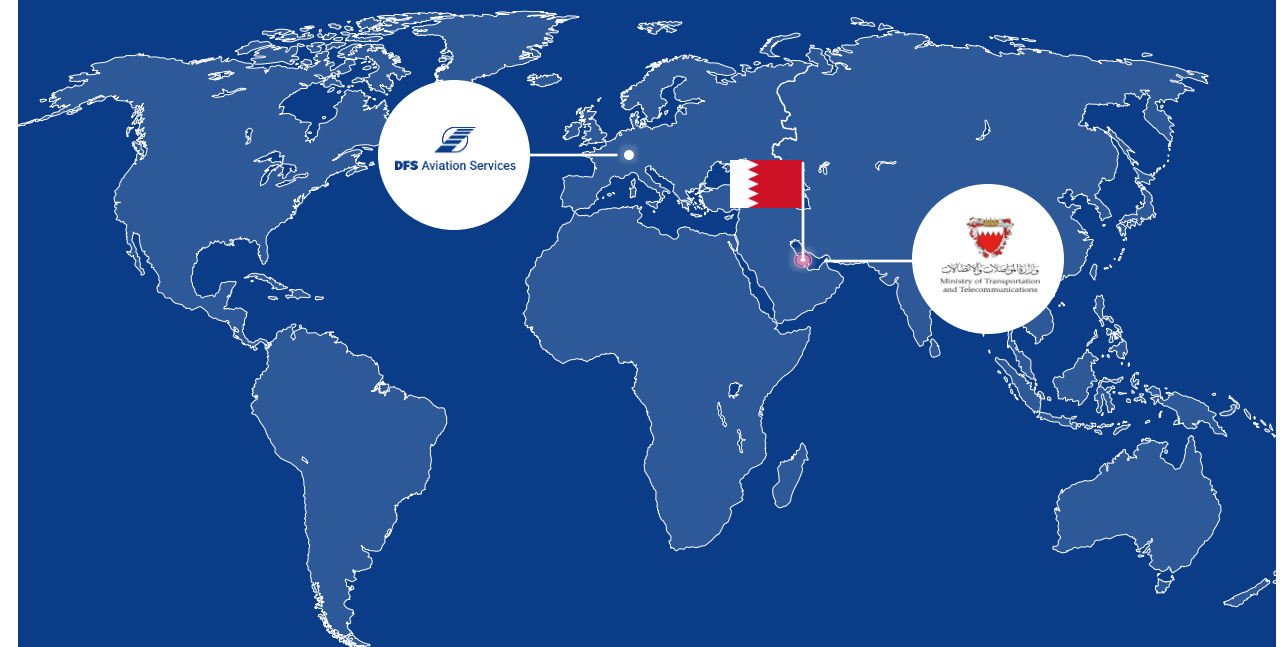

DFS Aviation Services

MORE THAN A SYSTEM ACQUISITION.

- Defining **mission & standards**
- Developing **work packages** and **checklists**
- Claiming **involvement** and **attract attention**
- Communicating as a **team**
- Trusting **experience & best practice**
- Preparing for **post-cutover**

DFS Aviation Services 

PROJECT INSIGHT.

BAHRAIN.

New Indra ATM system

In the context of moving Bahrain's ACC to a new facility, the new state of the art Indra ATM system went live without any interruptions.

EXPERTISE.

KNOWING
PARTNER-
SHIPS

At **DAS**, we offer more than “just” consulting services! We guide you through the whole project implementation process starting from **strategy development** to the later **post implementation support**. Through close collaboration, we can take on challenges based on your desired level of involvement – whether this is a **turnkey solution** or **advisory services**.

“We support the customer **from early strategy inception until implementation** and later operations. As **certified ANSP** with experience in **System Transition** we can assist in projects as an advisor for experienced guidance or take over the role as **full-service provider** including the technical infrastructure realisation. “
