

# ATS Management Training

Enable success through quality-trained leaders

## Overview

Managers and potential managers in air traffic services (ATS) continuously need to broaden their knowledge base and potential for problem solving and finding innovative strategies and tools to be applied in ATM.

DFS Aviation Services can provide management training that combines classroom-based lectures with the opportunity to discuss current day challenges and solutions in ATM with experts and managers.

The course is based on recognised leadership principles applied internationally in the ATM domain and knowledge of experienced subject matter professionals.

## Course

### Objectives

- Enhance and invigorate leadership skills and knowledge
- Enrich knowledge on current-day operational challenges and workable solutions
- Facilitate the exchange of information and knowledge with managers in key positions
